

EcoStay AI - Week 5 CRUD Verification

Intern ID: TBI-26100170 | Database: MongoDB Atlas

1. Create and Read

A new Aditi Verma booking was created and immediately displayed in the frontend booking table. The live count and MongoDB-backed record confirm successful Create and Read operations.

2. Update - Edit Form

The existing booking was opened from the frontend Edit action. Its stored values were loaded into the form, then status and total amount were changed.

The screenshot displays the 'EcoStay AI' Business Dashboard. A modal titled 'Update booking' is open, allowing for the modification of an existing booking. The modal contains the following fields:

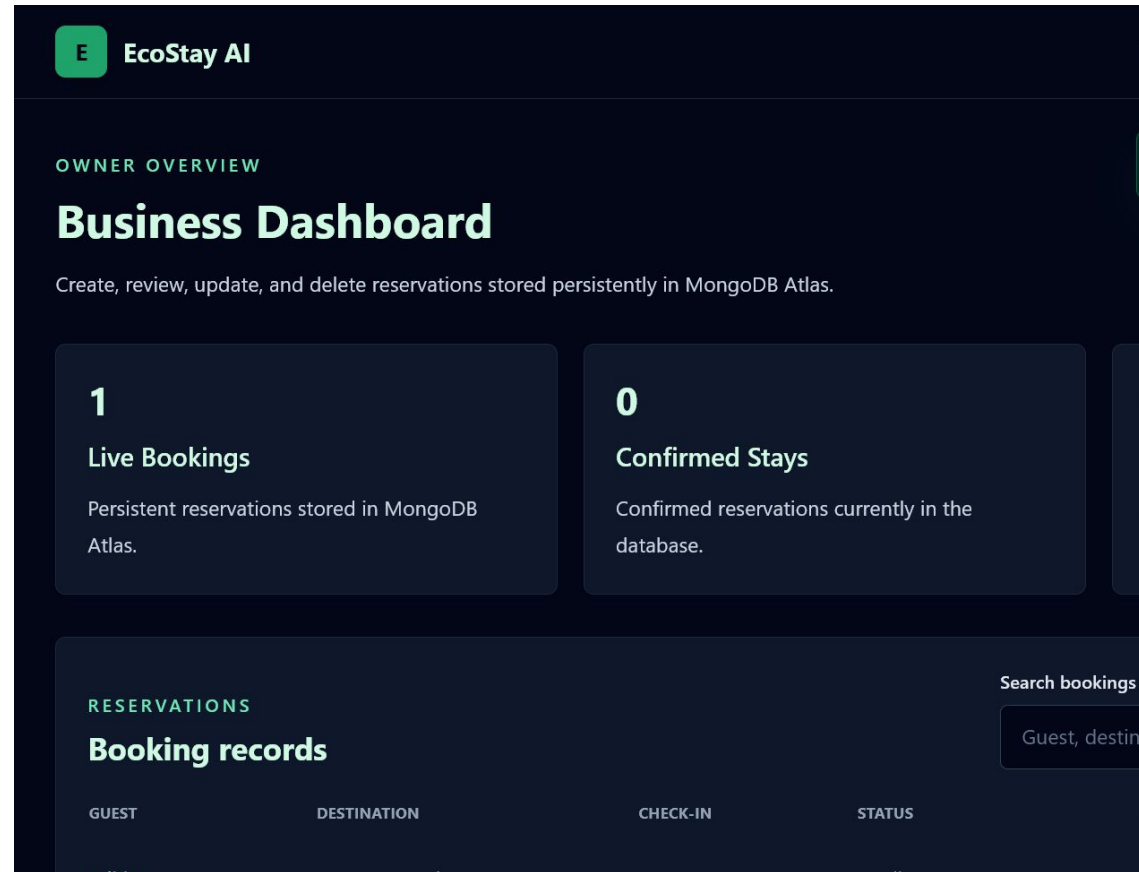

- Guest name:** Aditi Verma
- Destination:** Coorg, Karnataka
- Check-in date:** 08/20/2026
- Nights:** 4
- Status:** Pending (dropdown menu)
- Eco score:** 94
- Total amount (Rs.):** 24500

At the bottom of the modal are 'Cancel' and 'Update' buttons. The background dashboard shows a 'Live Bookings' section with 1 booking and a 'Booking records' table.

GUEST	DESTINATION	CHECK-IN	STATUS	REVENUE	ACTIONS
Aditi Verma	Coorg, Karnataka	2026-08-20	Confirmed	Rs. 22,000	Edit Delete

3. Update - Saved Result

The frontend submitted the update successfully. The booking table refreshed from the API and displayed the updated pending status and Rs. 24,500 amount.

4. Delete - Record Removed

The test booking was deleted and the refreshed frontend returned to zero bookings with an empty records table, confirming removal from MongoDB Atlas.
